

JAISON JAIDEEP LOBO

Bangalore, India

Jaison3666@gmail.com | +91-7624851480 | GitHub | Portfolio | linkedin.com/in/jaison-jaideep-lobo

Professional Summary

Backend Software Engineer with 4 years of experience developing scalable backend systems and REST APIs using Java and Spring Boot. Experienced in microservices architecture, distributed systems, MongoDB, Kafka, Docker, AWS, and GCP. Strong problem-solving skills with hands-on experience in enterprise applications, CI/CD, production support, integration testing, and cloud-native development.

Technical Skills

Languages: Java, JavaScript, TypeScript, Kotlin (Basic), Python (Basic), PHP

Backend: Spring Boot, Spring MVC, Hibernate, REST APIs, Microservices, Maven, JUnit, SOAP, GraphQL, Micronaut

Frontend: Angular, React.js, React Native HTML, CSS

Databases: MySQL, MongoDB, Oracle, NoSQL, PostgreSQL, SQLServer, Oracle

Cloud/DevOps: AWS, GCP, Firebase, Docker, Jenkins, Azure DevOps, CI/CD

Tools: Git, IntelliJ, VS Code, Postman, Kibana, Kafka, ML Ops, Spark, Automation, Agentic AI - Co-pilot, Claude

Concepts: Distributed Systems, Data Structures & Algorithms, OOPS, Design Patterns, Agile, Scrum, SDLC, Pipeline, Open Source Frameworks, System Design, Performance Optimization, Operational Health Monitoring.

Experience

Best Buy India (BBY India) – Software Engineer 1

Nov 2024 – Present

- Developed scalable REST APIs and backend services using Java, Spring Boot, Kafka, MongoDB, and microservices architecture.
- Integrated Twilio calling, Emergency SOS, and push notification services for the Worksite platform used by 8,500+ delivery agents.
- Contributed to a customer upselling feature generating approximately \$800K revenue within 2 months.
- Improved application quality through Cucumber integration testing and JUnit unit testing.
- Worked with GCP, Firebase, CI/CD pipelines, production debugging, and operational monitoring.

Infinite Computer Solutions – Software Engineer

Nov 2021 – Oct 2024

- Contributed to the ND MMIS healthcare platform using Java, Spring Boot, Angular, Hibernate, REST APIs, AWS, Docker, and Microservices.
- Worked on backend feature development, defect fixes, production support, and change requests for enterprise applications.
- Collaborated in Agile teams participating in sprint planning, stand-ups, deployments, and troubleshooting activities.
- Built and maintained scalable backend systems with focus on performance, reliability, and maintainability.

Projects

Worksite Order Fulfillment Platform – Developed backend APIs using Java, Spring Boot, Kafka, MongoDB, GCP, Firebase, and microservices architecture. Improved software reliability through integration and unit testing.

ND MMIS Healthcare Platform – Contributed to modernization of Medicaid management systems using Java, Spring Boot, Angular, Hibernate, REST APIs, AWS, Docker, and Microservices. Worked on defect resolution, backend enhancements, and production support.

Neerude Parish Project – Built a full-stack web application using Angular, Spring Boot, MySQL, Java, REST APIs.

Education

Alva's Institute of Engineering and Technology, Karnataka, India

2018 – 2022

Bachelor of Engineering in Computer Science and Engineering – CGPA: 8.4

Alva's Pre-University College, Moodbidri, India

2016 – 2018

Physics, Chemistry, Mathematics and Computer Science – Percentage: 70.88%

Achievements

- Solved DSA problems on LeetCode and GeeksForGeeks. Certified in Java, SQL, Git, Kafka, AWS, Angular, React, HTML, and CSS.
- Led hackathon and engineering project initiatives during academics.
